DETAILED ACTION

***Response to Arguments***

Applicant's arguments filed have been fully considered but they are moot in view of the new ground of rejection.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

*A person shall be entitled to a patent unless --*

*(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.*

*Claim 11 is rejected under 35 U.S.C. 102(b) as being anticipated by.*

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

*(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.*

Art Unit: 2153

Claims 1-2, 4-5, 7-8, 10-21 and 23-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smith et al. US patent 6,192,407 and further in view of Levac et al. US patent 5,872,926.

As per claims 1-2, Smith teaches using HTML to describe link destinations [PURL's] with parameter designating communication methods [see abstract lines 5-6]. Smith does not specifically teach the link specifying a "line assigned to a line connected".

Levac teaches a messaging system with multiple lines assigned to connect [see abstract: communication devices] via parameters specified within the message.

It would have been obvious for one of ordinary skill in the art to use the link destination encoding of Smith to Levac system because it would have enabled connecting for transmission via various device and protocol using standard encoding of the parameters [HTML, PURL] and enabled access and control using browser based application.

Claims 4-5, 10-21 and 23-25 are similarly rejected.
